

Webinar CPD Statement

TITLE OF WEBINAR: Advanced Posterior Morphology

SPEAKER: Hugo Filipe Costa de Sousa

EDUCATIONAL AIMS

Overview of what the activity will achieve.

This presentation is designed to deepen understanding of posterior dental morphology for dentists and dental technicians, focusing on the small details in anatomy, and occlusal morphology.

EDUCATIONAL OBJECTIVES

Should fulfil the aim. By the end of this activity, the participant should be able to.....

- Identify and describe key anatomical features of posterior teeth relevant to restorative procedures.
- Demonstrate advanced techniques for shaping and contouring occlusal posterior dental restorations.
- Apply occlusal adjustments to optimize functionality and aesthetics in posterior restorations.
- Recognize details in morphology and adapt restorative techniques to achieve natural-looking results.
- Enhance patient outcomes through improved accuracy in replicating natural posterior tooth structure.

LEARNING CONTENT

By the end of the session, participants will gain insights into accurately recreating natural posterior tooth morphology, improving both function and aesthetics. This will enhance clinical outcomes and elevate restorative precision in lab and chairside applications.

DEVELOPMENT OUTCOMES

This CPD course meets the criteria for the GDC's development outcomes C & D
